Control Panel Descriptions

SuperAdmin Dashboard

Role: System-wide administration and management

Full system administration access with complete control over all modules, users, settings, and system configurations.

Provides comprehensive oversight of the entire HCC system.

Finance Department Control Panel

Role: Department financial oversight and management

Department-level financial management for overseeing all financial operations, budgets, expenses, and financial reporting within the finance department.

Finance Control Panel

Role: Financial operations and reporting

General financial management including budget planning, expense tracking, invoice management, and financial reporting across the organization.

Finance Project Control Panel

Role: Project financial tracking and management

Project-specific financial management for tracking budgets, expenses, invoices, and financial performance of individual projects.

Logistic Control Panel

Role: Logistics operations and fleet management

General logistics management including vehicle fleet management, fuel tracking, trip planning, and logistics operations.

Logistic Project Control Panel

Role: Project logistics coordination

Project-specific logistics management for coordinating vehicles, trips, fuel, and transportation needs for individual projects.

Department Director Control Panel

Role: Department leadership and strategic management

Executive-level oversight for department directors to manage teams, projects, resources, and strategic planning within their department.

Project Manager Control Panel

Role: Project planning, execution, and delivery

Comprehensive project management including project planning, task assignment, team coordination, progress tracking, and project delivery.

Team Skills Control Panel

Role: Team development and skills management

Team and skills management for tracking employee skills, availability, project assignments, skill gaps, training needs, and team performance.

Employee Control Panel

Role: Employee self-service and reporting

Employee self-service portal for submitting work reports, field reports, deliverables, leave requests, and accessing personal project information.

Driver Control Panel

Role: Driver operations and vehicle management

Driver-specific interface for managing trips, fuel logs, vehicle inspections, trip reports, and transportation-related tasks.
